

Student's full name: Group n° :

First Term Exam in Written Expression

Artificial intelligence is transforming the modern world. It supports people to complete tasks faster. AI systems analyze large amounts of data , and they learn from patterns. Machines which learn from experience become more accurate as they process information. Many students use AI tools because they save time. AI can support education; however, it cannot replace human creativity. While AI improves productivity, some workers who fear unemployment express concern. Researchers develop new algorithms, and companies fund innovation; however, governments monitor the impact. If AI is used responsibly, it can benefit society; therefore, cooperation is essential. AI assists doctors, and it supports scientists who conduct research. Because AI systems depend on data that must be accurate, training processes are critical. Some countries create their citizens laws that regulate AI, while others encourage innovation. AI will continue to evolve as technology advances. People must understand how AI works, so they can use it wisely. Although AI is powerful, humans remain responsible for its impact.

1. Pick out from the paragraph the following: (8 pts)

- One simple sentence.

- One compound sentence then turn it to a complex sentence

- One complex sentence then turn it to a compound sentence.

- One compound complex sentence and identify its parts (main clause/ Subordinate clause/ Linking words)

2. Rewrite the underlined sentence then identify its pattern by naming all its constituent elements.

3. In the following sentence, underline the independent clause, put the dependent clause in brackets then identify the type of the sentence.

People must understand how AI works, so they can use it wisely.

Type of the sentence: _____

Activity two: All the following sentences contain errors. In the space provided, 1) Identify these errors as fragments, run-ons, comma splices, or unparallel structures then 2) Use one appropriate method to correct them. (7 pts)

1. World leaders discussed energy problems, and analyzed possible solutions. _____

2. Yearbook pictures will be taken tomorrow students should dress appropriately. _____

3. Although teacher asked several questions. None of the students responded. _____

4. Attaining a college degree is neither cheap nor will it be easy. _____

5. Yesterday, when I got off the school bus. _____

6. Big Bang theory explains how the universe started, it says everything began with an explosion 15 billion years ago. _____

8. Nikola Tesla is considered an important inventor in the field of electricity he invented alternating current.

9. Walking down a log narrow hallway in the middle of a haunted castle with bats flying around in every direction.

Activity Three: Write your own sentences following the given instructions . (5 pts)

1. A compound sentence that fits the following pattern: S+ V+I.O + D. O+ conjunctive adverb + S +V+ S.C

2. A compound complex sentence that includes the coordinating conjunction “yet”.

3. A complex sentence with a relative clause.

4. A simple sentence that contains an object complement.

Correction of the First Term Exam in Written Expression

Artificial intelligence is transforming the modern world. It supports people to complete tasks faster. AI systems analyze large amounts of data, and they learn from patterns. Machines which learn from experience become more accurate as they process information. Many students use AI tools because they save time. AI can support education; however, it cannot replace human creativity. While AI improves productivity, some workers who fear unemployment express concern. Researchers develop new algorithms, and companies fund innovation; however, governments monitor the impact. If AI is used responsibly, it can benefit society; therefore, cooperation is essential. AI assists doctors, and it supports scientists who conduct research. Because AI systems depend on data that must be accurate, training processes are critical. Some countries create their citizens laws that regulate AI, while others encourage innovation. AI will continue to evolve as technology advances. People must understand how AI works, so they can use it wisely. Although AI is powerful, humans remain responsible for its impact.

1. Pick out from the paragraph the following: (8 pts)

- **One** simple sentence.....0.5
_stce 1/ stce 2/ stce 13
- **One** compound sentence then turn it to a complex sentence..1.5
_stce 3/ stce 6/ stce 8
Example: AI systems analyze large amounts of data, and they learn from patterns.0.75
= AI systems analyze large amounts of data **as** they learn from patterns. 0.75
- One complex sentence then turn it to a compound sentence.1.5
Stce 4/ stce 5/ stce 7/ stce 11/ stce 12/ stce 13/ stce 15
Example: Many students use AI tools because they save time. 0.75
= Many students use AI tools, **for** they save time. 0.75
- One compound complex sentence and identify its parts (main clause/ Subordinate clause/ Linking words) 1.5
Stce 9/ stce 10/ stce 14
Example: **If** AI is used responsibly, **it can benefit society**; therefore, cooperation is essential.
Subordinate clause (0.5) main clause (0.25) main clause (0.25)
If === subordinating conjunction (0.25)
Therefore ===== conjunctive adverb (0.25)

2. Rewrite the underlined sentence then identify its pattern by naming all its constituent elements.1.5

Some countries **create** **their citizens** **laws**
C S (0.25) V (0.25) I.O (0.5) D.O (0.5)

3. In the following sentence, underline the independent clause, put the dependent clause in brackets then identify the type of the sentence. **1.5 pts**

People must understand (how AI works,) so they can use it wisely.

0.25

0.5

0.25

Type of the sentence: **compound-complex sentence. 0.5**

Activity two: All the following sentences contain errors. In the space provided, **1)** Identify these errors as fragments, run-ons, comma splices, or unparallel structures then **2)** Use one appropriate method to correct them. (7 pts)

10. World leaders discussed energy problems, and analyzed possible solutions. **Comma splice 0.5**

There are many methods to correct comma splice, remove the comma, or add a subject.

World leaders discussed energy problems and analyzed possible solutions.

World leaders discussed energy problems, and they analyzed possible solutions.

11. Yearbook pictures will be taken tomorrow, students should dress appropriately. **Run-ons 1**

Yearbook pictures will be taken tomorrow, so (;therefore,) students should dress appropriately.

Because Yearbook pictures will be taken tomorrow, students should dress appropriately.

12. Although teacher asked several questions. None of the students responded. **Fragment 1**

Although teacher asked several questions, none of the students responded

13. Attaining a college degree is neither cheap nor will it be easy. **Unparallel structure 0.5**

Attaining a college degree is neither cheap nor easy.

14. Yesterday, when I got off the school bus. **Fragment 1**

Yesterday, I got off the school bus./ Yesterday, when I got off the school bus, I met my old teacher.

15. Big Bang theory explains how the universe started, it says everything began with an explosion 15 billion years ago. **Comma splice 0.5**
(. It)/;/; moreover,

16. Sandy likes playing the clarinet, to march in the band, and watching the football games. **Unparallel structure 0.5**

....., marching in the band,

17. Nikola Tesla is considered an important inventor in the field of electricity, he invented alternating current. **Run-ons. 1**

Nikola Tesla is considered an important inventor in the field of electricity, for he invented alternating current

Nikola Tesla is considered an important inventor in the field of electricity because he invented alternating current

18. Walking down along narrow hallway in the middle of a haunted castle with bats flying around in every direction. **Fragment 1**

I was walking down alongdirections.

Walking down alongdirection is a scary experience.

Activity Three: Write your own sentences following the given instructions . (5 pts)

5. A compound sentence that fits the following pattern: S+ V+I.O + D. O+ conjunctive adverb + S +V+ S.C **1.5**

6. A compound complex sentence that includes the coordinating conjunction "yet". **1.5**

7. A complex sentence with a relative clause. **1**

8. A simple sentence that contains an object complement. **1**
